Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative was contacted to the effect of having Examiner's suggested changes imparted to the claim so to put the claimed matter in better condition for an allowance. The discussion revolved around adding to claim 27 the compilation settings pertinent to using control flow as recited in claim 1; and also to make some changes to the distinguishing aspect of the hardware configuration or compilation (by means of the control flow status) in claim 1 so that it would not be too broad or not yield a meaningful subject matter. A compromise between the Examiner and the representative has been effected so to partially improve claim 1 and expand claim 27 to meet the suggestion of the Examiner in light of the representative's wish not to narrow down the invention. .
